EDUCATION

California Polytechnic State University | San Luis Obispo, CA

Expected June 2027

Bachelor of Science (B.S) in Computer Science with a Concentration in Privacy and Security

Relevant Courses: Data Structures, Algorithms, Files & Databases, Object-Oriented Programming

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C++

Libraries & Frameworks: React.js, Node.js, Vue.js, JUnit, Maven, Pytest, Pandas

Technologies: Jest, Git, Docker, AWS Services, CI/CD

AI Tools: GitHub Copilot, Claude, ChatGPT

Certifications: AWS Cloud Practitioner

EXPERIENCE

Think Together | Riverside, CA

June 2024 - Sep. 2024

Program Leader

- Enhanced student engagement by 30% by designing interactive STEM and literacy activities for K–8 students.
- Improved classroom management efficiency by implementing structured routines and individualized strategies.
- Collaborated with a team of educators to deliver daily lesson plans, increasing overall program attendance and student satisfaction.

Morfin Landscaping | Ontario, CA

July 2025 - Sep. 2025

Operations Assistant

- Supported daily operations of a local lawn care business generating over \$4,000 in revenue.
- Increased client retention by 40% through consistent service quality, proactive communication, and independently resolving service issues.
- Automated client scheduling and payment reminder notifications using Python and AWS (Lambda, S3, Secrets Manager, EventBridge), reducing manual outreach and improving operational efficiency by 20%.

PROJECTS

Meet N' Eat (Group Project) | React Native (Expo), Node.js, Express, MongoDB

February 2026 - Present

- Developing a mobile restaurant meetup coordination app using React Native (Expo) and an Express.js backend.
- Implemented a frontend login interface with input validation and state management using React Hooks.
- Designed and extended backend data models using Mongoose, adding a friends relationship system via ObjectId references.
- Collaborated in a team using Git/GitHub with feature branches, pull requests, and code reviews, following Agile methodologies.

Serverless Ingestion Pipeline | Python, AWS (Lambda, S3, DynamoDB, CloudWatch)

May 2025

- Designed a serverless data ingestion system to validate, transform, and catalog invoices and CSVs from S3 in real time.
- Automated metadata extraction, error handling, and alerting via DynamoDB GSIs and CloudWatch, improving data quality and observability.

BMP Image Compressor/Decompressor (Huffman Coding) | C++ (Systems Programming)

September 2025

- Built UNIX CLI tools to compress/decompress 24-bit BMP files using per-channel Huffman coding and a 1–10 quality setting for lossy-to-lossless compression.
- Implemented frequency tables, Huffman tree generation, bit-packed encoding/decoding, and a custom file format containing metadata needed for full image reconstruction.
